

NAME. KIBUKA IVAN.

VILLAGE. BWAISE.

AGE. 10 YERAS

I was living with a man acted just like a real father to me, after a long time he told me that he was not my father and the the reason why he was living with is because he was a friend to my mother and the bad thing is that he did not know any of my relatives who could start living with me. After a short time this gentleman died of malaria sickness. After his burial I was taken to start living with his friend who after awhile lucked financial support for my food, medicine and etc. One day he decided to leave me in the house after taking all his assets away with him. I started sleeping on streets and begging from people. One day I was arrested by the police because I was found moving idle on the streets and after that because I was very young I was taken to a rehabilitation center (M-lisada children's home) I came to like the place very much and later started learning to play the base drum, side drum and currently am the best performer at m-lisada at both the side drum and bass drum.

I want to become a professional constructions engineer in future.
